

HORIZON

DISPATCH

Web-Based Dispatching Application and Fleet Tracking for Nationwide Push-to-Talk over Cellular (PoC) Communications

HORIZON Dispatch provides a professional grade dispatching application with an intuitive and flexible interface for efficient group communications and fleet management with Hytera PoC radios on the HORIZON nationwide Push-to-Talk over Cellular service.

HORIZON Dispatch supports instant nationwide group calling, individual calling, texting, and sharing images and videos. HORIZON Dispatch leverages the GPS built into Hytera PoC devices for tracking of locations and travel routes with time stamps.

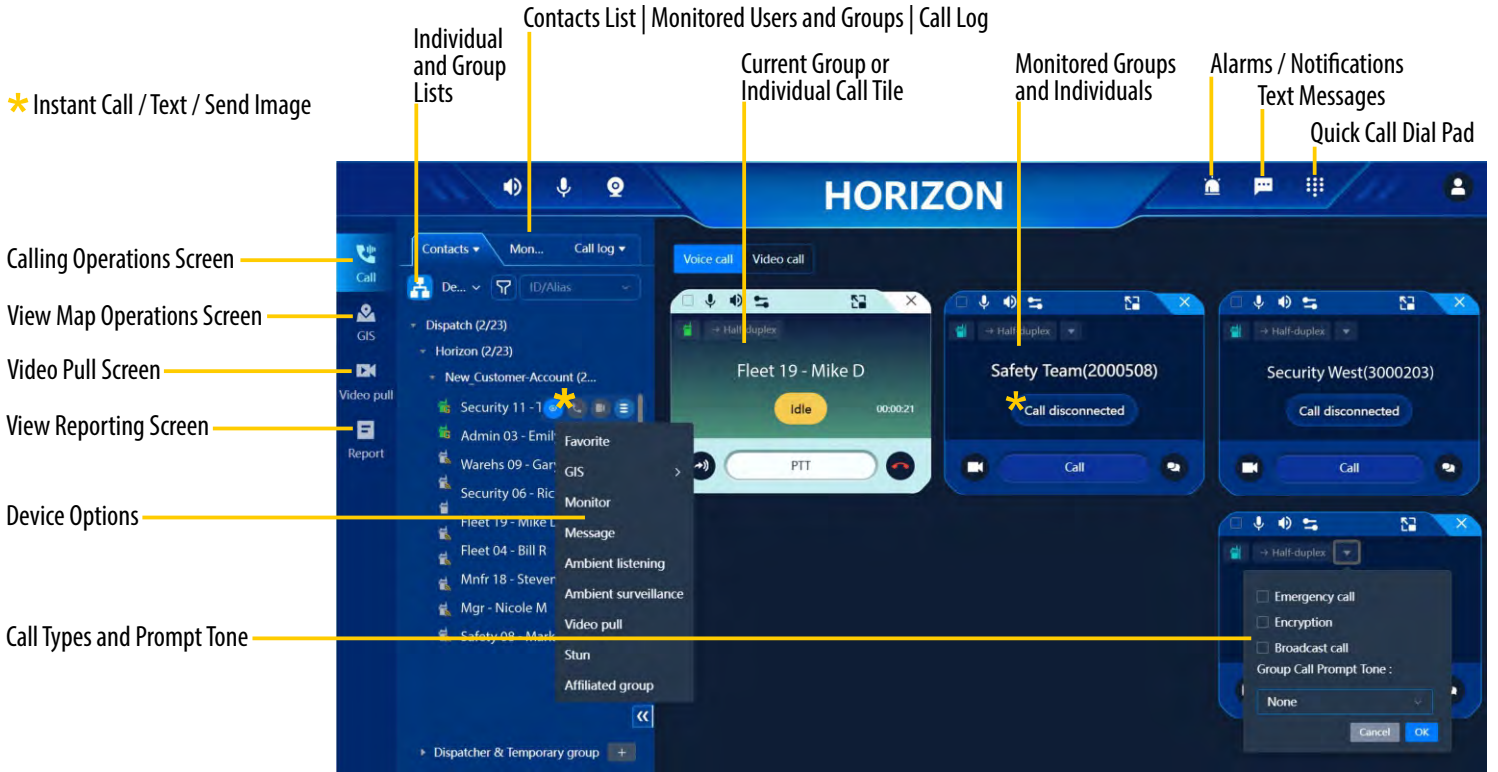

Look to HORIZON for Limitless Push-to-Talk Communications

User Interface

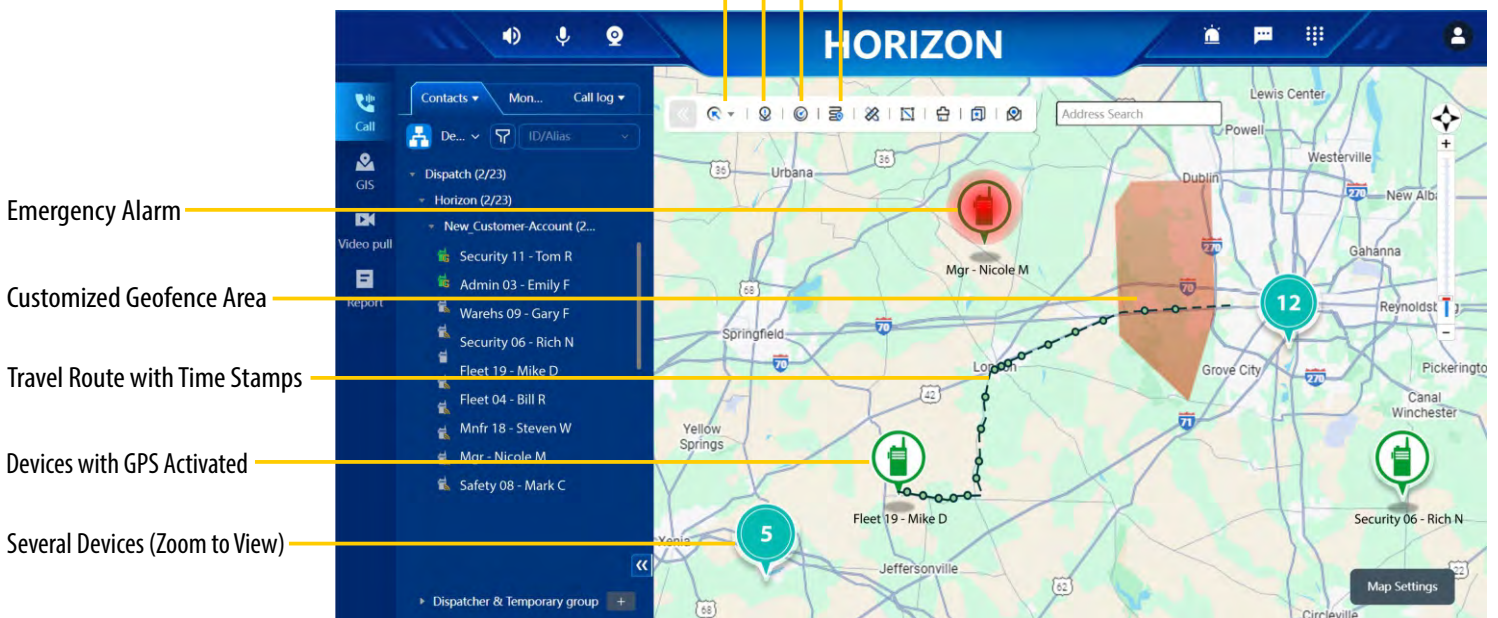

Dispatchers can customize the entire communication control center with multiple dispatch windows and move call tiles to any open window, making the handling of multiple calls much easier and faster.

Each calling tile has separate volume controls and calling options, allowing the dispatcher to quickly make an individual or group call, or send a text, image, or video. Dispatchers can also minimize call tiles to icons.

With the map interface, dispatchers can manage and coordinate users and fleets with GPS location tracking, travel routes and time stamps (active and historical), geofences, and speeding alarms

Dynamic Group Call (Cursor Selection on Map)
 Draw Geofence
 Overspeed Alarm
 Historical Route Tracking

Key Features

FLEXIBLE GROUP AND INDIVIDUAL CALLING

- Instant nationwide group and individual calling with a customized calling screen where the dispatcher can create commonly used groups for dispatch operations
- Call tiles can be moved to different screens and minimized to icons for easily handling multiple calls
- Quickly and easily put individuals into a special impromptu call group when needed
- Supports full-duplex calls where users can speak at any time, like on a cell phone
- When monitoring multiple calls, the volume levels can be adjusted for an individual or group
- Prompt tones and customized voice recordings can be used at the beginning of calls

MAP WITH GPS FLEET LOCATION TRACKING

- Enables tracking of driver locations and travel routes with finely selectable time stamp rates
- See live GPS route tracks and play back historical routes
- Real-time speed and direction with customizable speeding alarm
- Automatically associates physical street addresses with GPS location points
- Geofencing enables drawing of virtual geographic boundary based GPS location tracking
- Receive alarms when workers enter or leave geofence areas

SAFETY FEATURES

- Send and receive Emergency alarms or calls for enhanced worker safety
- Shows map location and visual alarm notifications of users that have pressed the emergency call button
- Dispatcher can interrupt existing calls in an emergency
- Dispatcher can activate remote ambient monitoring of audio during emergency situations
- Dispatcher can stun (temporarily disable) and revive (turn on) radios that are lost, stolen, or used maliciously

WEB-BASED APPLICATION

- HORIZON Dispatch works on any Windows based PC with an internet connection using a Chrome browser.
- No need for servers or installing and upgrading client software updates, simply sign into the web browser application
- Open multiple screens (calling, maps, reports, etc.) on multiple monitors to easily coordinate complex communications and logistics
- Supports unlimited simultaneous users with separate dispatcher accounts

TEXT MESSAGING

- All users can communicate with each other and dispatch with free-form voice or pre-programmed and customizable text or voice recorded messages
- Supports multiple message screens with text history for easily managing and monitoring several text strings

CUSTOMIZABLE LOGIN SCREEN AND LOGO

- Add your logo to provide a more unique, branded look and feel on the Dispatch login screen and upper left logo area

CALL RECORD STORAGE AND REPORTING OPTIONS

- Quickly review, play, search, and export logs for calls, messages, emergency alarms, geofencing alarms, and overspeed alarms
- Export reports to create tables, statistics, and graphs for individual and group call counts

MULTIMEDIA CAPABILITIES

- Dispatcher can share texts, images, and videos between remote users and dispatch
- Enables fast problem solving and decision making

Hytera PoC Devices

Hytera provides a wide variety of PoC devices for operation on the HORIZON nationwide PoC system and HORIZON Dispatch, including PoC handheld radios, PoC mobile radios, and PoC mobile computers.

- Industry-leading audio quality with AI-based digital noise suppression
- Longest battery life available
- Rugged and reliable
- Built in Wi-Fi, Bluetooth, and GPS

- Security Companies
